RE: Southern California Edison Company's Formula Transmission Rate Annual Update Filing in Docket No. ER19-1553 (TO2022)

Dear Ms. Bose:

Under Southern California Edison Company's ("SCE") Transmission Owner Tariff ("TO Tariff"), SCE calculates its retail and wholesale Base Transmission Revenue Requirements ("Base TRR") using a formula rate spreadsheet ("Formula Rate"). SCE hereby submits for informational purposes its annual formula transmission rate update filing ("TO2022 Annual Update"), pursuant to Section 3 of Attachment 1 to Appendix IX of SCE's TO Tariff (the "Formula Rate Protocols").

This submission is provided to the Commission for informational purposes only. This filing is not subject to the requirements of Section 205 of the Federal Power Act, and pursuant to Section 3(d)(3) of the Formula Rate Protocols, does not subject SCE's Formula Rate to modification.

SCE requests that the Commission issue a public notice of filing for the TO2022 Annual Update and establish a comment date.

I. Background

On October 27, 2017, in Docket No. ER18-169-000, SCE filed its Second Transmission Formula Rate with the Commission ("TO2018 Formula Rate"). The TO2018 Formula Rate superseded SCE's prior Formula Rate accepted in Docket No. ER11-3697 which terminated on December 31, 2017 ("Original Formula Rate"). Several entities intervened or protested the TO2018 Formula Rate filing. By Order dated December 29, 2017, the Commission accepted SCE's TO2018 Formula Rate and related 2018 TRR, suspended it for a nominal period, to be effective January 1, 2018, subject to refund, and established hearing and settlement judge procedures.[1] On September 16, 2019, an Offer of Settlement was filed with the Commission. On December 3, 2019, the Commission accepted the Offer of Settlement.[2]

On April 11, 2019, in Docket No. ER19-1553-000, SCE filed to amend the TO2018 Formula Rate proposing tariff changes necessary to reflect dramatic regulatory and financial conditions that had changed since the submission of the TO2018 Formula Rate ("TO2019A Formula Rate") associated with unprecedented wildfire impacts that occurred within the state of California. On June 11, 2019, the Commission accepted SCE's TO2019A Formula Rate and related revised 2019 Base TRR, suspended it for a five-month period, to become effective November 12, 2019, subject to refund, and established hearing and settlement judge procedures.[3] On July 1, 2020, SCE filed an Offer of Settlement under ER19-1553. The Offer of Settlement was approved on September 23, 2020.

SCE filed its first formula transmission rate Annual Update filing following the TO2019A settlement ("the TO2021 Annual Update") on November 20, 2020,

pursuant to the process outlined in the Formula Rate Protocols. The TO2021 rates went into effect on January 1, 2021.

On March 26, 2021, in Docket No. ER21-1521, pursuant to Section 8.b of the Formula Rate Protocols, SCE filed a modification to Schedule 20 of the TO2019A Formula Rate proposing tariff changes necessary to change SCE's Post Retirement Benefits Other than Pensions ("PBOPs") stated amount of the Authorized PBOPs Expense Amount, to be included for recovery in SCE's formula transmission rate. On May 17, 2021, the Commission issued a letter order accepting SCE's proposed changes and therefore SCE has incorporated the proposed changes into this TO2022 Annual Update.

On April 30, 2020, in Docket No. ER20-1720, SCE filed revisions to the TO2019A Formula Rate to comply with Order 864.[4] These revisions included the creation of additional schedules (9-ADIT-2 and 9-ADIT-3) to annually track information related to excess and deficient accumulated deferred income taxes caused by the Tax Cuts and Jobs Act ("TCAJA"). On October 9, 2020, SCE made a filing to correct an administrative error associated with the tariff record.[5] On November 20, 2020, the Commission's Office of Energy Market Regulation issued a Deficiency Letter, requesting additional information to process the filing. On December 11, 2020, SCE filed its response to the Deficiency Letter. SCE has incorporated the proposed revisions under ER20-1720 into this TO2022 Annual Update. On November 18, 2021, the Commission issued an Order On Compliance and accepted SCE's proposed Tariff revisions, and directed SCE to submit a further compliance filing within 60 days of such order.

On October 21, 2021, SCE filed Docket No. ER22-166 proposing discrete revisions to the TO2019A Formula Rate intended to ensure that following the

[5] SCE previously identified this error for the Commission and parties in its Motion for Leave to Respond and Response to Six Cities' Protest, filed in ER20-1720 on June 5, 2020. Accession Number 20200605-5213.

December 31, 2021 expiration of the accounting waiver authorized by the Commission in Docket No. ER21-1280, payments received from Morongo Transmission Limited Liability Company ("LLC") pursuant to the West of Devers ("WOD") Formula Rate are credited to the originating expense accounts in a manner that provides SCE's transmission customers the full benefit of the credits while remaining consistent with the requirements of the Uniform System of Accounts ("USofA"). SCE requested an effective date of January 1, 2022 for these revisions. As of the date of this filing, the proposed revisions are pending before the Commission. SCE has not incorporated the proposed revisions under ER22-166 into this TO2022 Annual Update.[6]

SCE is now submitting its Annual Update to the Commission in accordance with Section 3 of the Formula Rate Protocols, which specifies that each year SCE will file an Annual Update on or before December 1, revising the Base TRR and associated rates to be effective on January 1 of the upcoming Rate Year. The Rate Year for the TO2022 Annual Update is January 1, 2022 through December 31, 2022. In preparing this Annual Update, SCE used the TO2019A Formula Rate to establish its Base TRR.

As part of the TO2022 Annual Update, SCE and interested stakeholders engaged in a robust review process that began with the posting on SCE's website of the TO2022 Draft Annual Update on June 15, 2021. A formal informational request period was initiated on this same date, which ended on November 1, 2021. During this time SCE responded to over 180 data requests from various stakeholders. SCE also held a Draft Annual Update Conference on July 9, 2021, to provide an overview of the TO2022 Draft Annual Update. SCE held a follow-up conference call on October 15, 2021, to provide further information on the Annual Update and addressed additional stakeholder questions. On October 29,

[6] The WOD Formula Rate went into effect in 2021, and consequently has no effect on costs related to calendar year 2020, which is the Prior Year in this Annual Update.

2021, the California Public Utilities Commission ("CPUC"), along with several other interested parties (collectively the "Joint Customers"),[7] notified SCE that they had identified certain outstanding issues associated with SCE's TO2022 Draft Annual Update. In response, SCE held two additional conference calls with the Joint Customers on November 8 and 16, 2021. During, and subsequent to these conferences, SCE shared additional information regarding SCE's accounting, tariff application, and the resulting inputs to the TO2022 Annual Update.

II. SCE's Formula Transmission Rate

Pursuant to SCE's formula transmission rate, the Base TRR is calculated as the sum of the Prior Year TRR, the Incremental Forecast Period TRR ("IFPTRR"), a True Up Adjustment, and if required, a Cost Adjustment. The Prior Year TRR represents the transmission costs that SCE incurred in the Prior Year, which in this instance is calendar year 2020. The IFPTRR represents the incremental transmission costs that SCE expects to incur during the forecast period (in this case calendar years 2021 and 2022) as compared to the costs incurred in the Prior Year. The True Up Adjustment is the difference between actual transmission revenues and actual transmission costs during the Prior Year, as well as any applicable prior period adjustments. Therefore, this TO2022 Annual Update revises the retail Base TRR from the TO2021 Annual Update amount of $1.087 billion to $1.412 billion, a year-over-year change of $326 million. The wholesale Base TRR is revised from $1.082 billion to $1.395 billion, a year-over-year change of $313 million.

As described below, roughly half of this change relates to 1) a 2020 increase of the reserve for 2017/18 wildfires/mudslides of $1.297 billion, which

[7] In addition to the CPUC, the Joint Customers includes the California Department of Water Resources State Water Project, the Los Angeles Department of Water and Power, the Northern California Power Agency, the Transmission Agency of Northern California, and the Cities of Anaheim, Azusa, Banning, Colton, Pasadena, and Riverside, California.

increases A&G injuries and damages costs, and 2) an increase in FERC rate base of about $671 million. The remaining difference is largely due to the balancing account nature of the True-Up Adjustment. For TO2022 this is a charge of about $94 million whereas in TO2021 it was a credit of about $59 million.

III. Reasons for Changes in SCE's Base TRR

The Prior Year TRR for TO2022 is $1.269 billion, compared with $1.046 billion in TO2021. The IFPTRR in TO2022 is $111 million compared to $99 million in TO2021. The TO2022 Base TRR reflects a True Up Adjustment of $94 million (undercollection). This compares to a -$59 million (overcollection) True Up Adjustment in TO2021. Additionally, the TO2022 Base TRR reflects a Cost Adjustment of -$62 million, compared to no Cost Adjustment in TO2021. Combined, these changes add up to a $326 million increase in Base TRR from TO2021 to TO2022. The principal factors contributing to the change in Base TRR are summarized below:

- A&G (approximately +$92M): The increase in A&G expenses is primarily due to a 2020 upward adjustment to the reserve related to the 2017/18 wildfires/mudslides in the amount of $1,297 million. This entry recorded to FERC account 925 – Injuries and Damages, and FERC ratepayers were charged a labor allocated portion of this amount under Schedule 20 – A&G.
- Rate Base Impact (approximately +$63M): The year-over-year increase in 2020 FERC jurisdictional rate base was approximately $671 million, and was driven primarily by a $377 million increase in plant in service, as well as an increase in incentive CWIP plant balances of $326 million, partially offset by increases in rate base reducing items such as Accumulated Depreciation Reserve and Unfunded Reserves.
- True-Up Adjustment (approximately +$153M): The True-Up Adjustment is intended to reflect any over/undercollections in prior years. As discussed

above, the TO2021 True-Up Adjustment was -$59 million (i.e., a credit due to previous overcollections). This year's value of $94 million (i.e., a charge due to previous undercollections) is shown on Schedule 3, Line 30. This value reflects a required adjustment of $59 million (Schedule 3, Line 27) to ensure the True Up Adjustment accounts for the two-year lag inherent in the formula rate.

- Cost Adjustment (approximately -$62M): Pursuant to the Formula Rate Protocols, Section 1, SCE must include a Cost Adjustment "in the event that a discrete cost of service item (e.g., individual O&M expense, tax expense, or revenue credit) incurred anytime between the beginning of the Prior Year and the September 30 immediately preceding the filing of the Annual Update filing (i.e., a 21-month window) is a one-time item that will not recur in such Rate Year." Additionally, the Protocols require that the Cost Adjustment must amount to at least 3% of the Base TRR. Accordingly, SCE has made three Cost Adjustments. First, SCE included a Cost Adjustment associated with the 2020 $1,297 million A&G expense accrual mentioned above. Second, SCE included a Cost Adjustment associated with the Morongo Transmission LLC leased portion of the West of Devers Line. The capital forecast that is part of the TO2022 Annual Update filing assumes the entirety of the West of Devers Line will be in SCE's rate base during the forecast period. However, since the TO2022 Draft Annual Update Morongo Transmission LLC has leased a portion of the referenced project. Accordingly, this additional Cost Adjustment reduces the Retail Base TRR by the expected effect of the $400 million capital lease payment made by Morongo Transmission LLC, which was not reflected in the capital forecast.[8] Third, SCE included a Cost Adjustment

[8] The TO2023 Annual Update, which will true up calendar year 2021, will reflect a reduction in SCE's recorded 2021 plant in service consistent with the referenced Morongo capital lease payment of $400 million.

associated with a September 2021 expense accrual reflecting an upward adjustment to the reserve related to the 2017/18 wildfires/mudslides in the amount of $1,090 million (Schedule 1, Line 85).

On June 28, 2021, FERC's Division of Audits and Accounting (DAA) issued an audit report under Docket No. FA20-01-000. Pursuant to such report, SCE was directed to provide refunds to transmission customers related to finding 1, Accounting for Compromise Settlements, and finding 3, Allowance for Funds Used During Construction. SCE has calculated the required refunds to be reflected in the TO2022 Annual Update, and DAA has approved such refunds and method of implementation. Accordingly, SCE is now including such refunds in the TO2022 Annual Update which reduce the Retail Base TRR by approximately $1.4 million.[9]

Finally, as part of the TO2022 True Up Adjustment included in this update, SCE is correcting its True Up TRRs for prior calendar years.[10] The corrections reflected in this Annual Update are summarized below:

1. SCE has identified an input error relating to an A&G exclusion affecting the True Up TRR of calendar years 2018 and 2019. This error relates to an exclusion found in the workpaper titled "WP Schedule 20 A&G," tab titled "ShareholderAndOther," Section 3 - Order 668 Amount Transferred from O&M Accounts 569. The amount to be transferred to A&G from O&M, $38 million in 2018 and $39 million in 2019, should have been entered as a positive value in the workpaper for each respective year. Instead, due to an input error these entries were entered as negative values. This error caused total A&G to be reduced by the entered amounts, rather than increased as

[9] See Attachment 3 – Revisions to Formula Rate Inputs as Compared to the Draft Annual Update, for further details.
[10] Pursuant to Section 3.d.8 of the Formula Rate Protocols, SCE filed an Amended Annual Update informational filing on 11/15/2021 in Docket No. ER19-1553, which is the docket of the affected Annual Updates associated with these errors.

intended. The net TO2022 one-time adjustment related to this error is $10 million, as described in more detail in the workpaper titled "WP Schedule 3 One Time Adj-Prior Period."

2. SCE has identified an input error relating to an A&G exclusion affecting the True Up TRR of calendar years 2018 and 2019. The error relates to outside counsel expenses related to employment litigation or arbitration matters. The net TO2022 one-time adjustment related to this error is -$53, as described in more detail in the workpaper titled "WP Schedule 3 One Time Adj-Prior Period."
3. SCE has identified an input error relating to an A&G exclusion affecting the True Up TRR of calendar year 2018. The error relates to ACE/Spot bonuses that were not excluded from recovery due to a linking error in the workpaper titled "WP Schedule 20 A&G." The net TO2022 one-time adjustment related to this error is -$39,139, as described in more detail in the workpaper titled "WP Schedule 3 One Time Adj-Prior Period".
4. SCE has identified an input error relating to an A&G exclusion affecting the True Up TRR of calendar year 2019. The error relates to a BRRBA Distribution credit erroneously excluded. The net TO2022 one-time adjustment related to this error is -$140,611, as described in more detail in the workpaper titled "WP Schedule 3 One Time Adj-Prior Period."
5. SCE has identified an input error relating to an A&G exclusion affecting the True Up TRR of calendar year 2019. The error relates to a Pensions & Benefits Billed to Affiliates credit erroneously excluded. The net TO2022 one-time adjustment related to this error is -$23,358, as described in more detail in the workpaper titled "WP Schedule 3 One Time Adj-Prior Period".
6. SCE has identified an input error relating to an A&G exclusion affecting the True Up TRR of calendar year 2019. The error relates to EIX costs. In 2019 SCE excluded costs which were erroneously reported as 923 expenses

but which in fact recorded to FERC account 426, an account that is already excluded from the Formula Rate. The net TO2022 one-time adjustment related to this error is $5,491, as described in more detail in the workpaper titled "WP Schedule 3 One Time Adj-Prior Period".

7. On June 28, 2021, FERC issued SCE's Audit Report in Docket No. FA20-1 and required refunds related to compromise employee settlements for calendar years 2017-2019.[11] These refunds relate to A&G FERC Account 925. Additionally, the Audit Report required a refund related to the historical calculation of AFUDC, and its effect on calendar years 2017-2020. The net TO2022 one-time adjustment related to the compromise settlements refunds is -$399,297, as described in more detail in the workpaper titled "WP Schedule 3 One Time Adj-Prior Period". The net TO2022 one-time adjustment related to the AFUDC calculations is -$764,025, as described in more detail in the workpaper titled "WP Schedule 3 FERC Audit Refund AFUDC F3R2 and F3R13".

These corrections are reflected in the Formula Rate spreadsheet as a single One-Time Prior Period Adjustment of $9.6 million on Schedule 3, Line 12, Col 4, and a single One-Time Prior Period Adjustment of -$0.8 million on Schedule 3, Line 23, Col 4.

IV. Documents Submitted With This Filing

This filing consists of the following documents:

1) This filing letter;
2) An attestation by an SCE officer;

[11] The Audit Report requires an additional refund related to calendar year 2020, which is reflected as an exclusion to A&G costs under Schedule 20 in this TO2022 Annual Update. See Attachment 3 – Revisions to Formula Rate Inputs from the TO2022 Draft Annual Update, for more details.

3) Attachment 1: The populated formula rate spreadsheet, in both pdf and Excel formats, showing the calculation of the TO2022 Base TRR and associated rates;
4) Attachment 2: Retail and Wholesale Transmission rates to be effective on January 1, 2022;
5) Attachment 3: Revisions to Formula Rate Inputs from the TO2022 Draft Annual Update; and
6) Attachment 4: Workpapers supporting the inputs to Attachment 1, including information required pursuant to the Formula Rate Protocols and the TO2019A settlement.

Overview of SCE Retail Base TRR

SCE's retail Base Transmission Revenue Requirement is the sum of the following components:

TRR Component	Amount
Prior Year TRR	$1,268,908,455
Incremental Forecast Period TRR	$111,053,394
True-Up Adjustment	$94,363,375
Cost Adjustment	-$61,836,339
Base TRR (retail)	$1,412,488,884

These components represent the following costs that SCE incurs:

1) The Prior Year TRR component is the TRR associated with the Prior Year (most recent calendar year).
The Prior Year TRR is calculated using End-of-Year Rate Base values, as set forth in the "1-BaseTRR" Worksheet.

2) The Incremental Forecast Period TRR is the component of Base TRR associated with forecast additions to in-service plant or CWIP, as set forth in the "2-IFPTRR" Worksheet.

3) The True Up Adjustment is a component of the Base TRR that reflects the difference between projected and actual costs, as set forth in the "3-TrueUpAdjust" Worksheet.

4) The Cost Adjustment component may be included as provided in the Tariff protocols.

Notes:

1) Any amount of "Sub-Total Local Taxes" or "Payroll Taxes Expense" may be excluded if appropriate with the provision of a workpaper showing the reason for the exclusion and the amount of the exclusion.
2) No change in Return on Common Equity will be made absent a Section 205 filing at the Commission.
Does not include any project-specific ROE adders. See Schedule 15 at Lines 31-39.
In the event that the Return on Common Equity is revised from the initial value, enter cite to Commission Order approving the revised ROE on following line.
Order approving revised ROE: Docket No. ER19-1553
3) No change in the South Georgia Income Tax Adjustment "Credits and Other" term will be made absent a filing at the Commission. Investment Tax Credit Flowed Through amount shall be negative $520,000 through the Prior Year of 2018, negative $183,000 for the Prior Year of 2019, and $0 thereafter.
4) Cost Adjustment may be included as provided in the Tariff protocols.
5) Prior Year Incentive Adder Reversal backs out the revenue requirement associated with any project-specific Incentive Adders (Line 77). Applicable pursuant to settlement under ER19-1553.

Calculation of Incremental Forecast Period TRR ("IFPTRR")

The IFP TRR is equal to the sum of:
1) Forecast Plant Additions * AFCR
2) Forecast Period Incremental CWIP * AFCR for CWIP

1) Calculation of Annual Fixed Charge Rates:

Line			
	a) Annual Fixed Charge Rate for CWIP ("AFCRCWIP")		
1			
2	AFCRCWIP represents the return and income tax costs associated with $1 of CWIP,		
3	expressed as a percent.		
4			
5	AFCRCWIP = CLTD + (COS * (1/(1 - CTR)))		
6			
7	where:

Calculation of True Up Adjustment Component of TRR

1) Summary of True Up Adjustment calculation:

a) Attribute True Up TRR to months in the Prior Year (see Note #1) to determine "Monthly True Up TRR" for each month (see Note #2).
b) Determine monthly retail transmission revenues attributable to this formula transmission rate received during Prior Year.
c) Compare costs in (a) to revenues in (b) on a monthly basis and determine "Cumulative Excess (-) or Shortfall (+) in Revenue with Interest".
d) Include previous Annual Update Cumulative Excess or Shortfall in Prior Year (from Previous Annual Update Line 23) and any One-Time Adjustments in Column 4 (Lines 11 and 12 respectively).
e) Continue interest calculation through the end of the Prior Year (Line 23) to determine Cumulative Excess or Shortfall for this Annual Update.

2) Comparison of True Up TRR and Actual Retail Transmission Revenues received during the Prior Year, Including previous Annual Update Cumulative Excess or Shortfall in Revenue.

   Enter with the same sign as in previous Annual Update. If there is no Previous Annual Update True Up Adjustment, then enter $0.
3) Enter monthly interest rates in accordance with interest rate specified in the regulations of FERC at
   18 C.F.R. §35.19a on lines 12 to 23, Column 6.
4) Enter any One Time Adjustments on Column 4, Line 12 (or other appropriate). If SCE is owed enter as positive, if SCE is to return to customers enter as negative.
   One Time Adjustments include:
   a) In the event that a Commission Order revises SCE's True Up TRR for a previous Prior Year,
      SCE shall include that difference in the True Up Adjustment, including interest, at the first opportunity, in accordance with tariff protocols.
      Entering on Line 12 (or other appropriate) ensures these One Time Adjustments are recovered from or returned to customers.
   b) Any refunds attributable to SCE's previous CWIP TRR cases (Docket Nos. ER08-375, ER09-187, ER10-160, and ER11-1952), not previously returned to customers.
   c) Amounts resulting from input errors impacting the True Up TRR in a previous Formula Rate Annual Update pursuant to Protocol Section 3(d)(8).
   Workpaper for Line 12: WP Schedule 3 One Time Adjustment - Prior Period
   Workpaper for Line 23: WP Schedule 3 FERC Audit Refund AFUDC_F3R12 and F3R13
5) Fill in matrix of all retail revenues from Prior Year in table on lines 63 to 74.
6) Enter Total Sales to Ultimate Consumers on line 77 and verify that it equals the total on line 75.
7) If true up period is less than entire calendar year, then adjust calculation accordingly by including $0 Monthly True Up TRR and $0
   Actual Retail Base Transmission Revenues for any months not included in True Up Period.

Notes:

1) The true up period is the portion (all or part) of the Prior Year for which the Formula Transmission Rate was in effect.
2) The Monthly True Up TRR is derived by multiplying the annual True Up TRR on Line 1 by 1/12, if formula was in effect. In the event of
   a Partial Year True Up, use the Partial Year TRR Attribution Allocation Factors on Lines 40 to 51 for each month of Partial Year True Up.
   Only enter in the Prior Year, Lines 12 to 23, or portion of year formula was in effect in case of Partial Year True Up.
   Partial Year True Up Allocation Factors calculated based on three years (2008-2010) of monthly SCE retail base transmission revenues.
3) "Actual Retail Base Transmission Revenues" are SCE retail transmission revenues attributable to this formula transmission rate.
   as shown on Lines 63 to 74, Column 1.
4) Enter "Shortfall or Excess Revenue in Previous Annual Update" on Line 11, or other appropriate (from Previous Annual Update, Line 23, Column 9).
5) Monthly Interest Rates in accordance with interest rate specified in the regulations of FERC (See Instruction #3).
6) "Cumulative Excess (-) or Shortfall (+) in Revenue wo Interest for Current Month" is, beginning for the January month,
   the amount in Column 9 for previous month plus the current month amount in Column 5. For the first December, it is the amount in Column 5.
7) Interest for Current Month is calculated on average of beginning and ending balances (Column 9 previous month and Column 7 current month).
   No interest is applied for the first December.
8) Only provide if formula was in effect during Prior Year.
9) Only include Base Transmission Revenue attributable to this formula transmission rate.
   Any other Base Transmission Revenue or refunds is included in "Other".
   The Base Transmission Revenues shown in Column 1 shall be reduced to reflect any retail customer refunds provided by SCE associated with the
   formula transmission rate that are made through a CPUC-authorized mechanism.
10) Other Transmission Revenue includes the following:
   a) Transmission Revenue Balancing Account Adjustment revenue.
   b) Transmission Access Charge Balancing Account Adjustment.
   c) Reliability Services Revenue.
   d) Any Base Transmission Revenue not attributable to this formula.

Instructions:
1) Use weighted average (by time) of the Return on Equity in effect during the Prior Year in determining the "Cost of Capital Rate" on Line 19 and the "Equity Rate of Return Including Preferred Stock" on Line 23 in the event that the ROE is revised during the Prior Year. In this event, the ROE used in Schedule 1 will differ from the ROE used in this Schedule 4, because the Schedule 1 ROE will be the most recent ROE, whereas the Schedule 4 Cost of Capital Rate and Equity Rate of Return including Com. + Pref. Stock will be based on the weighted-average ROE.

Calculation of weighted average Cost of Capital Rate in Prior Year:
If ROE does not change during year, then attribute all days to Line a "ROE at end of Prior Year" and none to "ROE at start of PY"

Notes:

1) Amounts on Line 13 from corresponding account Schedule 7, column 2.
Amounts on Line 1 must match corresponding account Schedule 7, Column 2 for previous year.
The amounts for each month on the remaining lines are calculated by summing the following values:
a) Other ISO Transmission Activity without Incentive Plant Activity on Lines 108-119 for the same month;
b) ISO Incentive Plant Activity on Lines 67 to 78 for the same month; and
c) The previous month balance of the Transmission Plant - ISO amounts on Lines 1-13.
For instance, the amount for May of the Prior Year (on Line 6) for Account 353 (Column 5) is the sum of the following values:
a) the "Other ISO Transmission Activity without Incentive Plant Activity" for May of the Prior Year (on Line 112, Column 5);
b) the "ISO Incentive Plant Activity" for May of the Prior Year (on Line 71, Column 5),
c) and the "Transmission Plant - ISO" amount for April of the Prior Year (on Line 5, Column 5).
2) Amounts on Line 15 must match 6-Plant Study amounts for Distribution Plant - ISO for previous year.
Amounts on Line 16 must match amounts on 6-PlantStudy for Distribution Plant - ISO.
3) Reconciles to BOY and EOY FERC Form 1 (FF1 207, Lines 48-56 , Column g). Workpaper: WP Schedule 6&8
4) Includes recorded Transmission Plant-In-Service additions, retirements, transfers and adjustments. Monthly differences from previous matrix.
5) Includes balances for SCE Incentive Projects.
6) Monthly differences from previous matrix.
7) Amount in matrix on lines 41 to 52 minus amount in matrix on lines 67 to 78
8) Amount in "Total Transmission Activity Not Including Incentive Plant Activity" matrix divided by Total on Line 92 for each account/month.
9) Amount on Line 13 less amount on Line 1 for each account.
10) Line 79
11) Amount on Line 105 less amount on Line 106 for each account.
12) For each column (FERC Account) divide Line 107 by Line 92 to arrive at a ratio for each column.
Apply the ratio of each column to each monthly value from Lines 80-91 to calculate the values for
the corresponsing months listed in Lines 108-119.

Total on this line is also equal to FF1 207.58g (Total Transmission Plant)
less FF1 207.57g (Asset Retirement Costs for Transmission Plant).
2) Only accounts 360-362 included as there is no ISO plant in any other Distribution accounts.

Instructions:

1) Perform annual Transmission Study pursuant to instructions in tariff.
2) Enter total amounts of plant from FERC Form 1 in Column 1, "Total Plant".
3) Enter ISO portion of plant in Column 2, "Transmission Plant - ISO, or "Distribution Plant - ISO".

Notes:

1) Amounts on Line 13 based on current year Plant Study. Amounts on Line 1 shall be based on previous year Plant Study, and shall match amounts on Line 13 in previous year Annual Update.

The amounts for each month on the remaining lines are calculated by summing the following values:

a) Depreciation Expense (on Lines 27 to 38) for the same month;
b) Other Transmission Activity (on Lines 55 to 66) for the same month; and
c) Balances for Transmission Depreciation Reserve (on Lines 1 to 13) for the previous month.

For instance, the amount for May of the Prior Year (on Line 6) for Account 353 (Column 5) is the sum of the following values:

a) Depreciation Expense for May of the Prior Year (on Line 44, Column 5);
b) Other Transmission Activity for May of the Prior Year (on Line 59, Column 5); and
c) The balances for Transmission Depreciation Reserve for April of the Prior Year (on Line 5, column 5).

2) Amounts on Line 15 derived from Plant Study for previous year Prior Year.
Amounts on Line 16 derived from Plant Study for Prior Year.
3) From 17-Depreciation, Lines 24 to 35.
4) From 6-PlantInService, Lines 93 to 104.
5) Line 13 - Line 1.
6) Line 39.
7) Line 52 - Line 53.
8) Multiply the montly "Total Transmission Allocation Factors" ratios found in Lines 40-51 by the "Other Activity" on Line 54.

2) Sum of project specific values from lines 55-79, 81-105, 107-131, 133-157, 159-183, 185-209, 211-235, 237-261, 263-287, 289-313, 315-339, …

Instructions:

1) Enter recorded amounts of CWIP during Prior Year on Lines 1-13, 15-27 (including December of year previous to Prior Year).
2) Enter forecast project specific values on lines 55-79, 81-105, 107-131, 133-157, 159-183, 185-209, 211-235, 237-261, 263-287, 289-313, 315-339 ...
3) If Commission approval is granted to include CWIP in Rate Base for additional projects, include additional tables for each of those additional projects.

TRANSMISSION PLANT HELD FOR FUTURE USE

Inputs are shaded yellow

Transmission Plant Held for Future Use shall be amounts of Electric Plant Held for Future Use (account 105) intended to be placed under the Operational Control of the ISO, plus an allocated amount of any General Electric Plant Held for Future Use, with the allocation factor being the Transmission Wages and Salaries AF.

10	Gain or Loss on Transmission Plant Held for Future Use --- Land	$0	SCE Records

Instructions:
1) For any Electric Plant Held for Future Use intended to be placed under the Operational Control of the ISO, list on lines 2a, 2b, etc. Provide description in Column 1. Note type of plant (land or other) in Column 2. Under "Source" (Column 5), state the line number on FERC Form 1 page 214 from which the amount is derived. BOY amount will be EOY value from previous year FERC Form 1, EOY amount will be in current year FF1.
2) For any Electric Plant Held for Future Use classified as General note amount on Line 4.
3) Add additional lines 2 i, j, k, etc. as necessary to include additional projects intended to be placed under the Operational Control of the ISO.
4) Gains and Losses on Transmission Plant Held for Future Use - Land is treated in accordance with Commission policy. Any gain or loss on non-land portions of Transmission Plant Held for Future Use is not included.

Notes:
1) Amount of Line 1 not intended to be placed under the Operational Control of the ISO.

Determination of amount of Abandoned Plant and Abandoned Plant Amortization Expense

Input data is shaded yellow

Initially Abandoned Plant Amortization Expense and Abandoned Plant are both zero.

Upon Commission approval of recovery of abandoned plant costs for a specific project or projects, SCE will complete this worksheet in accordance with that Order.

	Project	Commission Order
Orders Providing for Abandoned Plant Cost Recovery:		
	…	…

Abandoned Plant for each project represents the amount of costs that the Order approves for inclusion in Rate Base.

Abandoned Plant Amortization Expense for each project represents the annual amortization of abandoned costs that the Order approves as an annual expense.

Line		Amount for Prior Year	Note:
1	Abandoned Plant Amortization Expense:	$0	Sum of projects below for PY.

EOY Abandoned Plant	EOY HV Abandoned Plant (Note 1)	Abandoned Plant Amort. Expense

Notes:
1) "EOY HV Abandoned Plant" is amount of "EOY Abandoned Plant" that would have been High Voltage (>= 200 kV).

Instructions:
1) Upon Commission approval of recovery of abandoned plant costs for a project:
   a) Fill in the name the project in order (First Project, Second Project, etc.).
   b) Fill in the table with annual End of Year ("EOY") Abandoned Plant, EOY HV Abandoned Plant, and Abandoned Plant Amortization Expense amounts in Accordance with the Order.
   If table can not be filled out completely, fill out at least through the Prior Year at issue.
   c) Sum project-specific amounts for each project and enter in lines 1, 2, and 3 for the Prior Year at issue.
   (BOY value is EOY value from previous year)
2) Add additional projects if necessary in same format.
3) Add additional years past 2025 if necessary.

Plant Balances For Incentive Projects Receiving either ROE Incentives ("Transmission Incentive Plant") or CWIP ("CWIP Plant") **Workpaper:** WP Schedule 14 Incentive Plant

Input data is shaded yellow

A) Summary of Incentive Project plant balances receiving ROE incentives ("Transmission Incentive Plant") and/or CWIP ("CWIP Plant") and calculation of balances needed to determine the following:

1) Rate Base in Prior Year
2) Prior Year Incentive Rate Base - End of Year
3) Prior Year Incentive Rate Base - 13-Month Average

Transmission Incentive Project plant balances and CWIP Plant may affect the following:

a) CWIP Plant during the Prior Year is included in Rate Base (used in Prior Year TRR and True Up TRR).
b) Forecast Period Incremental CWIP contributes to Incremental Forecast Period TRR
c) CWIP Plant receiving an ROE adder contributes to Prior Year Incentive Rate Base - EOY, or Prior Year Incentive Rate Base - 13 Month Average as appropriate.
d) "TIP Net Plant In Service" at EOY Prior Year is used to calculate the PY Incentive Rate Base (on EOY basis).
e) "TIP Net Plant In Service" in PY is used to calculate the Prior Year Incentive Rate Base (on 13-month average basis).

Instructions:

1) Upon Commission approval of any incentives for additional projects, add additional projects and provide cite to the Commission decision.

Determination of Incentive Adders Components of the TRR

Input data is shaded yellow

Two Incentive Adders are calculated:
a) The Prior Year Incentive Adder is a component of the Prior Year TRR.
b) The True Up Incentive Adder is a component of the True Up TRR.

1) Calculation of Incremental Return on Equity Factor

The Incremental Return on Equity Factor is the incremental Prior Year TRR expressed per 100 basis points of ROE incentive, for each million dollars of Incentive Net Plant. It is calculated according to the following formula:

IREF = CSCP * 0.01 * (1/(1 - CTR)) * $1,000,000

Line	where:		Value	Source
1	CSCP = Common Stock Capital Percentage		47.5000%	1-BaseTRR, L 47
2	CTR = Composite Tax Rate		27.9836%	1-BaseTRR, L 59
3		IREF =	$6,596	Above formula

2) Determination of multiplicative factors for use in calculating Incentive Adders:
Multiplicative factors are used to calculate the Incentive Adders on an Transmission Incentive Project specific basis. Multiplicative factor for each project is the ratio of its ROE adder to 1%.

Line		ROE Adder	Multiplicative Factor	Source
4	1) Rancho Vista	0.75%	0.75	14-IncentivePlant, L 211
5	2) Tehachapi	1.25%	1.25	14-IncentivePlant, L 214
6	3) Devers to Col. River	1.00%	1.00	14-IncentivePlant, L 217
7				
8	…			

3) Calculation of Prior Year Incentive Adder (EOY)
1) Determine Prior Year Incentive Adder for each Incentive Project by multiplying the IREF, the Multiplicative Factor, and the million $ of Prior Year Incentive Rate Base.
2) Sum project-specific Incentive Adders to yield the total Prior Year Incentive Adder.

Line		Prior Year Incentive Rate Base	Multiplicative Factor	Prior Year Incentive Adder	Source
9	1) Rancho Vista	$136,014,896	0.75	$672,837	14-IncentivePlant, L 14, Col. 1

12					
13	…				
14		Prior Year Incentive Adder =		$25,580,297	Sum of above PY Incentive Adders for each individual project

4) Calculation of True-Up Incentive Adder
1) Determine True Up Incentive Adder for each Incentive Project by multiplying the IREF, the Multiplicative Factor, and the million $ of True Up Incentive Net Plant.
2) Sum project-specific Incentive Adders to yield the total True Up Incentive Adder.

Line		True-Up Incentive Net Plant	Multiplicative Factor	True-Up Incentive Adder	Source

39	Total ROE for Plant In Service in True Up TRR:	10.96%	Line 36 + Line 38

Instructions:
1) If additional projects receive ROE adders, add to end of lists, and include in calculation of each Incentive Adder.

Notes:
1) Column 1: The True Up Incentive Adder for each Incentive Project equals the IREF on Line 3, times the applicable Multiplicative Factor on Lines 15 to 18, times the million $ of TIP Net Plant In Service on Lines 21 to 24.
Column 2: The After Tax True Up Incentive Adder is derived by multiplying the amounts in Column 1 by (1 - CTR) (Where the CTR is on Line 2).

Forecast Plant Additions for In-Service ISO Transmission Plant

Yellow shaded cells are Input Data

Forecast Plant Additions represents the total increase in ISO Transmission Net Plant, not including CWIP, during the Rate Year, incremental to the year-end Prior Year amount.
It is calculated on a 13-Month Average Basis during the Rate Year.

Depreciation Expense:	$274,400,278	Line 67 + Line 68 + Line 69

Notes:

1) Depreciation Expense for each account for each month is equal to the previous month balance of Transmission Plant - ISO for that same account, times the Monthly Depreciation Rate for that account. Monthly rate = annual rates on Line 17a etc. divided by 12.

2) Depreciation Expense for each account is equal to the Average BOY/EOY value on Line 44 times the Depreciation Rate on Line 48.

Instructions:

1) Depreciation rates on lines 17a-17m are input based on the stated values of ISO Transmission Plant depreciation rates from Schedule 18 of the Formula Rate Spreadsheet in effect during the Prior Year.

2) In the event that depreciation rates stated on Schedule 18 to be applied to Distribution Plant - ISO are revised mid-year, calculate Depreciation Expense for for Distribution Plant - ISO on Line 53 utilizing the weighted-average (by time) of the annual depreciation rates in effect in the Prior Year.

Notes:

1) "Adjusted Operations and Maintenance Expenses for each account" are the total amounts of O&M costs booked to each Transmission or Distribution account, less adjustments as noted.
2) Reasons for excluded amounts:
   A: Exclude entire amount, all attributable to CAISO costs recovered in Energy Resource Recovery Account.
   B: Exclude amount related to MOGS Station Expense.
   C: Exclude amount attributable to CAISO costs recovered in Energy Resource Recovery Account.
   D: Exclude amount recovered through to Reliability Services Balancing Account, the Transmission Access Charge Balancing Account Adjustment, and the American Reinvestment Recovery Act for the Tehachapi Wind Energy Storage Project.
   E: Exclude amount of costs transfered to account from A&G Account 920 pursuant to Order 668.
   F: Excludes shareholder funded costs.

3) Total TDBU NOIC is allocated to Transmission and Distribution in proportion to labor in the respective functions. Transmission NOIC ("Non-Officer Incentive Compensation") equals Total TDBU NOIC times the Transmission NOIC Percentage calculated below. Distribution NOIC equals Total TDBU NOIC times the Distribution NOIC Percentage below.

Total TDBU NOIC is on Line: 47

	Percentage	Calculation
Transmission NOIC Percentage:	27.6101%	Line 33, Col 3 / Line 43, Col 3
Distribution NOIC Percentage:	72.3899%	Line 41, Col 3 / Line 43, Col 3

4) NOIC attributable to ISO Transmission (Column 7) is calculated utilizing a percentage equal to the ratio of total ISO O&M Labor Expenses in column 7 (exclusive of NOIC) to the total labor expenses in column 3 (exclusive of NOIC). That allocator, which is identified below, is then applied to the value in Column 3 to arrive at the NOIC attributable to ISO Transmission in Column 7.
Resulting Percentage is: 42.72%
5) "ISO Operations and Maintenance Expenses" is the amount of costs in each Transmission or Distribution account related to ISO Transmission Facilities.
6) See Column 9 for references to source of each Percent ISO.
7) SCE shall make no adjustments to recorded labor amounts related to non-labor labor and/or Indirect labor in Schedule 19.

e	Other	-$2,569,165	SCE Records and Workpapers
f	Trans. And Dist. Business Unit	-$9,126,424	SCE Records and Workpapers
g	Total:	-$17,396,019	Sum of d to f

Note 3: PBOPs Exclusion Calculation

		Amount	Note:
a	Current Authorized PBOPs Expense Amount:	$0	See instruction #4
b	Prior Year Authorized PBOPs Expense Amount:	$6,329,000	Authorized PBOPs Expense Amount during Prior Year
c	Prior Year FF1 PBOPs expense:	$0	SCE Records
d	PBOPs Expense Exclusion:	-$6,329,000	c - b

Note 4:

Amount in Line 31, column 2 equals amount in Line 8, column 1 because all Franchise Requirements Expenses are excluded Franchise Fees Expenses component of the Prior Year TRR are based on Franchise Fee Factors.

Instructions:

1) Enter amounts of A&G expenses from FERC Form 1 in Lines 1 to 14.
2) Fill out "Itemization of Exclusions" table for all input cells. NOIC amount in Column 3, Line 24 is calculated in Note 2. The PBOPs exclusion in Column 4, Line 30 is calculated in Note 3.
   a) Exclude amount of any Shareholder Adjustments, costs incurred on behalf of SCE shareholders, from relevant account in Column 1.
   b) Include as an adjustment in Column 1 for Account 920 any amount excluded from Accounts 569.100, 569.200, and 569.300 in Schedule 19 (OandM) related to Order 668 costs transferred.
   c) Exclude entire amount of account 927 "Franchise Requirements" in Column 2, as those costs are recovered through the Franchise Fees Expense item.
   d) Exclude any amount of Account 930.1 "General Advertising Expense" not related to advertising for safety, siting, or informational purposes in column 1.
   e) Exclude any amount of expense relating to secondary land use and audit expenses not directly benefitting utility customers.
   f) Exclude from account 930.2:
      1) Nuclear Power Research Expenses.
      2) Write Off of Abandoned Project Expenses.
      3) Any advertising expenses within the Consultants/Professional Services category.
   g) Exclude the following costs included in any account 920-935:
      1) Any amount of "Provision for Doubtful Accounts" costs.
      2) Any amount of "Accounting Suspense" costs.
      3) Any penalties or fines.
      4) Any amount of costs recovered 100% through California Public Utilities Commission ("CPUC") rates.
3) NOIC adjustment in Column 3, Line 24 is made by determining the difference between the total accrued NOIC amount included in the FERC Form 1 recorded cost amounts and the actual A&G NOIC payout (see note 2).
NOIC adjustment in column 3, Line 26 is made by entering the amount of accrued NOIC that is capitalized.
4) Determine the PBOPs exclusion. The authorized amount of PBOPs expense (line a) may only be revised pursuant to Commission acceptance of an SCE FPA Section 205 filing to revise the authorized PBOPs expense, in accordance with the tariff protocols. Accordingly, any amount different than the authorized PBOPs expense during the Prior Year is excluded from account 926 (see note 3). Docket or Decision approving authorized PBOPs amount: Docket No. ER21-1521
5) SCE shall make no adjustments to recorded labor amounts related to non-labor labor and/or Indirect labor in Schedule 20.
6) Any A&G costs associated with wildfires other than the 2017/18 Wildfire/Mudslide Events shall be reflected in A&G accounts on a cash basis during the year in which associated cash payments are made. In the event an initial cost accrual is made in a year to one or more A&G accounts 920-935, SCE shall exclude from A&G cost recovery any amount not paid in cash during that year through an entry to Column 1, Lines 24-37 of the "Itemization of Exclusions" matrix to the account in which the initial expense accrual was made. As cash payments related to the initial expense accrual are made in future years, SCE shall also include those expenses in A&G cost recovery on a cash basis through an entry to the Itemization of Exclusions matrix.

Notes:

1- CPUC Jurisdictional service related.

2- Subject to sharing per the Gross Revenue Sharing Mechanism (GRSM), adopted in CPUC D.99-09-070. On an annual basis, once SCE obtains $16,671,389.55 (Threshold Revenue) in NTP&S Revenues, any additional revenues (Incremental Gross Revenues) that SCE receives are shared between shareholders and ratepayers. For GRSM categories deemed Active, the Incremental Gross Revenues are shared 90/10 between shareholders and ratepayers. For those categories deemed Passive, the Incremental Gross Revenues are shared 70/30 between shareholders and ratepayers.

3- Generation related.

4- Non-ISO facilities related.

5- ISO transmission system related.

6- Subject to balancing account treatment

7- Allocated based on CPUC GRC allocator in effect during the Prior Year. The weighted average (by time) shall be used if more than one allocator is in effect during the Prior Year.
ISO Allocator = 0.0609 Source: CPUC D. 19-05-020

8- ISO portion of Traditional OOR relates to monthly revenues received from customers for facilities that are part of the ISO network.

9- Edison ESI is a subsidiary company. Gross revenues are not reported in FF-1, only net earnings. Net Earnings for ESI are reported on Acct 418.1, pg 225.5e.

10- The first $16,671,389 million in gross revenues generated by GRSM activities are automatically classified as Threshold Revenue.

11- Allocator is equal to the jurisdictional split of the Threshold Revenue, which is jurisdictionalized as $5.425M to FERC ratepayers and $11.246M to CPUC ratepayers per the 2009 CPUC General Rate Case (D. 09-03-025). The ISO ratepayers' share of ratepayer revenue is $5.425M/$16.671M = 32.54%.

12- Allocated based on the CPUC Base Revenue Requirement Balancing Account (BRRBA) allocator in effect during the Prior Year. The weighted average (by time) shall be used if more than one allocator is in effect during the Prior Year. ISO portion of revenue is treated as traditional OOR.

ISO Allocator = 0.0609 Source: CPUC D. 19-05-020

13- Mono Power Company is a subsidiary company. Net Earnings are reported on Acct 418.1, pg 225.11e. Revenues and costs shall be non-ISO.

14- SCE Capital Company is a subsidiary company. Net Earnings are reported on Acct 418.1, pg 225.23e. Revenues and costs shall be non-ISO.

15- Southern States Realty is a subsidiary company. Gross revenues are not reported in FF-1, only net earnings. Net Earnings for Southern States Realty are reported on Acct 418.1, pg 225.17e.

16- For subsidiaries that are subject to GRSM, Column D contains gross revenues. Input on Line 30D contains the associated expenses.

17- Per GRC Decision D.87-12-066, for ratemaking purposes EMS financials are consolidated with SCE's. See FERC Form 1 page 123.3 under "Equity Investment Differences" . Consequently, net income of EMS is not reported separately in FERC Form 1 and is not a part of FERC Account 418.1 totals. To ensure that ratepayers receive the net income from this subsidiary SCE includes EMS net income in the formula on line 28f. This amount is reversed as part of line 30 to remain consistent with the totals reported in FERC Form 1.

NETWORK UPGRADE CREDIT AND INTEREST EXPENSE

10	Total Acct 242 - Miscellaneous Current and Accrued Liabilities	$823,821,944	FF1 113.48c

Notes:

1 Beginning of Year Balances are from December of the year previous to the Prior Year.
2 End of Year Balances are from December of the Prior Year.
3 Only projects that are in Rate Base in the year reported are included.
4 Interest relates to refund of facility and one-time payments by generator. For facility costs, pre-in-service date interest is excluded. For one-time costs, pre-in-service and post-in-service interest is included.

Determination of Regulatory Assets/Liabilities and Associated Amortization and Regulatory Debits/Credits

Line

1 Other Regulatory Assets/Liabilities are a component of Rate Base representing costs that are created resulting from the ratemaking
2 actions of regulatory agencies. Pursuant to the Commission's Uniform System of Accounts, these items include amounts recorded
3 in accounts 182.x and 254. This Schedule shall not include any costs recovered through Schedule 12.
4
5 SCE shall include a non-zero amount of Other Regulatory Assets/Liabilities only with Commission
6 approval received subsequent to an SCE Section 205 filing requesting such treatment.
7
8 Amortization and Regulatory Debits/Credits are amounts approved for recovery in this formula transmission rate representing the
9 approved annual recovery of Other Regulatory Assets/Liabilities as an expense item in the Base TRR, consistent
10 with a Commission Order.

Calculation of Wholesale Difference to the Base TRR

Workpaper: WP Schedule 25 Wholesale Difference Inputs are shaded yellow

The Wholesale Difference to the Base TRR represents the amount by which the Wholesale Base TRR differs as compared to the Retail Base TRR. This difference is attributable to differences in the following six items, as approved by Commission Order 86 FERC ¶ 63,014 in Docket No. ER97-2355.

These six items may affect the Base TRR by affecting Rate Base, or affecting an annual expense (amortization). If the annual amortization affects Income Taxes, there is an additional annual Income Tax Effect. The table summarizes these impacts for each item:

Line		Rate Base Difference	Expense (Amortization) Difference	Expense Tax Impact
1	a) Depreciation	Yes	Yes	No
2	b) Taxes Deferred -Make Up Adjustment (South Georgia)	Yes	Yes	Yes
3	c) Excess Deferred Taxes	Yes	Yes	Yes
4	d) Taxes Deferred - Acct. 282 ACRS/MACRS	Yes	Yes	No
5	e) Uncollectibles Expense	No	Yes	No
6	f) EPRI and EEI Dues	No	Yes	No

1) Calculation of Wholesale Rate Base Difference and Wholesale Rate Base Adjustment

a) Quantification of the Initial 2010 Wholesale Rate Base Difference and annual change

The difference between Retail and Wholesale Rate Base is attributable to the following four items, with the Initial Prior Year 2010 Rate Base differences and annual changes as follows:

		Data Source		Col 1 2010 Rate Base Difference (Wholesale less Retail)	Col 2 Annual Change (Amortization)
7	1) Accumulated Depreciation	Fixed values		$31,556,000	-$2,176,300
8	2) Taxes Deferred - Make Up Adjustment	Fixed values		-$35,044,000	$2,503,000
9	3) Excess Deferred Taxes	Fixed values		-$624,650	$43,100
10	4) Taxes Deferred - Acct. 282 ACRS/MACRS	Fixed values		-$7,410,000	$511,200
11			Totals:	-$11,522,650	$881,000

b) Quantification of the Wholesale Rate Base Adjustment

The Wholesale Rate Base Adjustment represents the impact on the Wholesale Base TRR relative to the Retail Base TRR of the Wholesale Rate Base Difference for the Prior Year.

		Data Source	Value	Notes/Instructions
12	Fixed Charge Rate	2-IFPTRR Line 16	9.34%	1

14	Wholesale Rate Base Difference for Prior Year		-$2,712,650	3
15	Wholesale Rate Base Adjustment	Line 14 * Line 12	-$253,463	

2) Calculation of Wholesale Expense Difference

The annual Wholesale Expense Difference impact is the negative of amounts stated in Lines 7 to 10 above, Column 2. It represents the effect on expenses (Wholesale less Retail) of amortizing the associated balances each year. If an annual amortization amount affects Income Taxes, the expense difference must be grossed up for income taxes.

For the following Prior Years: 2018 – 2020

4) In the event that either the Federal or State Income Tax Rate applicable to the Rate Year differs from that in effect during the Prior Year, the True Up TRR for the Prior Year will be calculated utilizing the same Formula Rate Spreadsheet except for the Income Tax rate(s). The difference between the True Up TRR calculated in such workpaper using the Income Tax Rates that were in effect during the Prior Year and the True Up TRR otherwise calculated by this formula shall be entered as a One Time Adjustment on Schedule 3, ensuring that the Formula Spreadsheet correctly calculates the True Up TRR for the Prior Year to be based on the Income Tax Rate(s) that were in effect during that year. For the Prior Years of 2016 and 2017, both of which will have Income Tax Rates that differ between the Prior Year and the Rate Year due to the passage of the 2017 Tax Cuts and Jobs Act, this provision will be implemented as part of the Section 6 of the Formula Rate Protocols, which will calculate the True Up TRR for those years based on a Federal Income Tax Rate of 35%.

	Prior Year	FF Factor	U Factor	Notes
5	2020	0.92481%	1.14091%	Calculated according to Instruction 3

Notes:

1) Franchise Fees represent payments that SCE makes to municipal entities for the right to locate facilities within the municipality.

Instructions:

1) Enter Franchise Fee and Uncollectibles Factors as approved by the California Public Utilities Commission ("CPUC") in modules 1 and 2 above pursuant to Instruction 2. If approved factors changed during Prior Year, enter both, and note period of time for which each applies in "From" and "To" columns, and number of days each was in effect during the Prior Year in "Days in Prior Year" Column.
2) Franchise Fees Factor is calculated from CPUC Decision by dividing adopted Franchise Fees by Total Operating Revenues less Franchise Fees. Uncollectibles Factor is calculated by dividing adopted Uncollectibles expense by Total Operating revenues less Uncollectibles Expense. Resulting FF & U Factors represent factors that, when applied to TRR without FF and U will correctly determine FF and U expense.
3) Calculate in module 3 the weighted average FF and U factors from the factors in modules 1 and 2 based on the number of days each FF and U factor was in effect during the Prior Year at issue.

	Percent	Calculation
Prior Year FF Factor:	0.92481%	((L1 FF Factor * L1 Days) + (L2 FF Factor * L2 Days))/(L1+L2 Days)
Prior Year U Factor:	1.14091%	((L3 U Factor * L3 Days) + (L4 U Factor * L4 Days))/(L3+L4 Days)

Notes:

1) See Col 9 of Lines 35a, 35b, 35c, etc.
2) Sales forecast in total Giga-watt hours usage, represents the customers' total annual GWh usage. Based on same forecast as Gross Load forecast in Schedule 32, Line 1, but at customer meter level. Does not include Backup GWh included in Column 4 (the sum of Column 3 and 4 equals total Sales Forecast).
3) Backup GWh represents the amount of electric service that is provided by SCE to a customer who has an onsite generating facility during unscheduled outages of the customer's on-site generator. Only applies to TOU-8-Standby-SEC, TOU-8-Standby-PRI, TOU-8-Standby-SUB Rate Groups.
4) Amount of energy included in the sales forecast that is not subject to transmission charges pursuant to the California Public Utilities Commission ("CPUC") approved Net Energy Metering Program.
5) Sales forecast pertaining to the sum of monthly maximum supplemental Mega-watt demand, applies to demand charge schedules
6) Sales forecast pertaining to the sum of monthly contracted standby Mega-watt demand, applies to standby schedules
7) Net Forecast in total Giga-watt hours usage - represents the customers' annual Net GWh, applicable to Non-Demand Charge Schedules such as Residential or Small General Service
8) Recorded sales from Sample meters adjusted for population - use to set the total demand rate for the optional time-of-use schedules within the GS-1 rate group
9) Line 1b2, Col11 = Line 1b Col9 * Line 1b Col11 * 10^6
10) Total demand rate for the optional time-of-use schedules within the GS-1 rate group, Line 1b2:Col10 = Line 1b2:Col12 (which = Line 1b2:Col11 / ((Line1b:Col12 + Line1b:Col13) * 10^3)
11) Sum of the TOU-8 Standby and TOU-8 Non-Standby billing determinants in Line1:Col6
12) For TOU-8 Rates revenue = Supplemental Demand Charge on Line 9 Column 8 * Maximum Demand on Lines 1 Column 6
13) For optional time-of-use schedules within the GS-1 rate group (Line16b:Col6), = (Line1b$_2$:Col11 - Line16:Col3) / Line1b:Col12 / 10^3
14) For the non TOU-8-Standby rate group, it is the minimum of Line16i:Col7, or the total demand rate in Line1:Col10
15) Applicable to time-of-use schedules within the GS-1 rate group
16) Rates associated with Rate Groups GS-2 and TOU-GS-3 are calculated on a combined basis, so that the rate is the sum of the combined Revenue Associated with Supplemental Demand or Energy in Column 2 (line 16d and 16e) divided by the sum of the sum of the Billing Determinants in Column 8 (Line 1d and 1e).
17) Applicable to the optional schedules that contain horse power charge such as PA-1
18) GWh for TOU-8-Standby-SEC, TOU-8-Standby-PRI, TOU-8-Standby-SUB Rate Groups are placed in TOU-8-SEC, TOU-8-PRI, TOU-8-SUB Rate Groups respectively.

Revisions to Formula Rate Inputs as Compared to the Draft Annual Update

Attachment 3

Revisions to Formula Rate Inputs as Compared to the Draft Annual Update

This attachment lists the changes reflected in this TO2022 Annual Update filing relative to the TO2022 Draft Annual Update Formula Rate Spreadsheet that SCE posted on its website on June 15, 2021.

The revisions from the Draft Annual Update are as follows:

(1) Schedule 1 – Base TRR: Pursuant to the Formula Rate Protocols, Section 1, SCE is including in the TO2022 Annual Update filing two Cost Adjustments in addition to the negative $83,133,820 that was part of the Draft Annual Update on line 85 of Schedule 1. The first is in the amount of negative $48,564,647. This new Cost Adjustment is related to the leasing of portions of SCE's West of Devers Project to Morongo Transmission. In July 2021 Morongo Transmission entered into the lease arrangement and made a lease payment of $400,000,000 to SCE. Accordingly, as of this date the plant subject to such lease will be accounted for as electric plant leased to others. In the TO2022 Draft Annual Update, SCE forecasted that the entirety of the West of Devers Project would be in SCE's rate base during the Rate Year (2022). This assumption was reasonable because at the time of the draft posting Morongo Transmission had not yet executed the lease. Given that the lease has now been executed, SCE is making a Cost Adjustment to reduce costs in the Rate Year given that the leased portion of the referenced project will not be in SCE's rate base during the Rate Year. The second Cost Adjustment is in the amount of $69,884,756 and is associated with a September 2021 expense accrual reflecting an upward adjustment to the reserve related to the 2017/18 wildfires/mudslides in the amount of $1,090 million. Finally, the wildfire related Cost Adjustment previously included in the draft posting is being slightly revised downward from negative $83,133,820 to negative $83,156,448 due to the revisions to the Transmission Wages and Salaries Allocation Factor resulting from the A&G revisions outlined below. Combined, these changes bringing the total cost adjustment to negative $61,836,339. Support for the Cost Adjustment is included in the workpaper titled WP Schedule 1 Cost Adjustment. This change increases the TO2022 Retail Base TRR by $21,297,481.

(2) WP Schedule 14 Incentive Plant: The Tehachapi accumulated depreciation amount for December 2019 shown in the Draft Annual Update workpaper does not match what is reported in the draft TO2022 Formula Rate, Schedule 14, line 54, Col 2. SCE notes that the amount reported in Schedule 14 of the draft TO2022 Formula Rate is correct. SCE has corrected this workpaper in the TO2022 Annual Update filing. This error does not impact the transmission revenue requirement.

(3) WP Schedule 20: The exclusion of $13,851,524 from FERC account 930.2 on page 2, line 2ff of the referenced workpaper was incorrectly labeled as "Generation – PV" in the Draft Annual Update. SCE has corrected the label to "Nuclear – PV" in the TO2022 Annual Update filing. This error does not impact the transmission revenue requirement.

(4) Schedule 20 – A&G: The excluded amount of $4,314,518 in WP Schedule 20, tab "shareholderExcDetail", cell B24, which feeds into the total exclusion amount of $9,473,549, included $2,310,118.08 in excluded costs which were erroneously reported as 923 expenses but which in fact recorded to FERC account 426, an account that is already excluded from the Formula Rate. Accordingly, SCE has revised the referenced WP to reflect a total A&G account 923 exclusion totaling $7,163,431.57 flowing into the Formula Rate in the TO2022 Annual Update filing. Additionally, SCE has determined that this error also occurred in 2019, where $79,471.82 in costs were excluded from account 923 expenses, yet this amount actually recorded to account 426. SCE has corrected this error in the TO2022 Annual Update filing. This error, including the associated One-Time adjustment related to 2019, increases the TO2022 Retail Base TRR by $359,704.

(5) Schedule 20 – A&G: The inputs in WP Schedule 20, tab "Incentives", lines A.2.4, A.2.5. and A.2.6 Column A contained the incorrect values for actual Non-Officer Incentive Compensation ("NOIC") payouts of $55,038,439, $26,106,687, and 95,108,829, respectively. The correct values are $60,321,784, $27,186,830, and $96,575,545. Similarly, tab "Incentive Caps", line 1, Column E contained the incorrect value of $176,253,955 for actual NOIC payout. The correct value is $184,084,158.

Additionally, line B.4.4, and tab "Incentive Caps", line 2, contained an incorrect value for actual Officer Executive Incentive Compensation ("OEIC") of $7,830,203. The correct value should have been $3,467,015.

This error in the referenced WP resulted in a corresponding error to the inputs to Schedule 20 of the Formula Rate. SCE has corrected this error in the TO2022 Annual Update filing. This error reduces the TO2022 Retail Base TRR by $512,537.

(6) Schedule 25 – Wholesale Difference: The inputs to lines 27 and 28 relating to EPRI and EEI Dues excluded from wholesale rates were inadvertently transposed. EPRI dues were reported as $46,948 but should have been $468,351. EEI Dues were reported as $468,351 but should have been $46,948. SCE has corrected this error in the TO2022 Annual Update filing. This error does not impact the transmission revenue requirement.

(7) Schedule 28 – FFU: SCE has updated the Uncollectibles Expense Factor based on discussions with the CPUC pertaining to uncollectibles associated with the Prior Year (2020), to be consistent with approvals in Advice Letter 4377-E-A. The revised Uncollectibles Factor is reduced from 1.3459% to 1.1409%, and is reflected in Schedule 28 – FFU of the Formula Rate and in WP Schedule 28 FFU. This change reduces the TO2022 Retail Base TRR by $5,420,733.

(8) Schedule 29 – Wholesale TRRs: SCE has incorporated into lines 2, 3, and 4 a change to the Wholesale Transmission Revenue Balancing Account Adjustment ("TRBAA") inputs to be consistent with SCE's TRBAA Update filed on November 1, 2021 in FERC Docket ER22-308.

(9) On June 28, 2021, FERC's Division of Audits and Accounting (DAA) issued an audit report under Docket No. FA20-01-000. Pursuant to such report, SCE was directed to provide refunds to transmission customers related to finding 1, Accounting for Compromise Settlements, and finding 3, Allowance for Funds Used During Construction. SCE has calculated the required refunds to be reflected in the TO2022 Annual Update, and DAA has approved such refunds and method of implementation. Accordingly, SCE is now including such refunds in the TO2022 Annual Update.

Finding 1, Accounting for Compromise Settlements, is as follows:

> SCE improperly recorded approximately $7.3 million of compromise settlement payments relating, at least in part, to alleged employment discrimination in Account 925, Injuries and Damages. As a result of the improper accounting for compromise settlements, SCE overstated its annual transmission revenue requirement and overbilled wholesale transmission customers.

As part of the TO2022 Annual Update, SCE has included a One-Time Adjustment related to the refunds for 2017, 2018, and 2019 since these are adjustments that relate to prior annual updates. This One-Time Adjustment is included in the TO2022 calculation of the True-Up Adjustment in Schedule 3 of the Formula Rate. Details of the One-Time Adjustment calculation are included in the workpaper titled "FERC Audit Refund Analysis_F1R3 and F3R13". The One-Time Adjustment related to 2017, 2018, and 2019 totals negative $399,297. The refunds related to calendar year 2020 do not relate to prior annual updates but instead relate to the current TO2022 Annual Update. Accordingly, SCE has made an adjustment to reflect the appropriate cost exclusions related to 2020 in Schedule 20 (A&G) of the Formula Rate, and the workpaper titled "WP Schedule 20". The A&G exclusion related to 2020 totals negative $1,260,864.

Finding 3, Allowance for Funds Used During Construction, is as follows:

> SCE's method for computing and applying its AFUDC rate to construction projects was deficient. Specifically, SCE improperly excluded short-term debt related to energy procurement margin and collateral postings, and improperly excluded $100 million of long-term debt related to nuclear fuel procurement from its AFUDC rate calculation. In addition, SCE improperly accrued $182,586 of AFUDC on a suspended construction project during the audit period. As a result, SCE overaccrued AFUDC included in utility plant accounts and overbilled wholesale transmission customers.

As part of the TO2022 Annual Update, SCE has included a One-Time Adjustment related to the refunds for 2017, 2018, 2019, and 2020 related to this finding. This One-Time Adjustment is included in the TO2022 calculation of the True-Up Adjustment in Schedule 3 of the Formula Rate. Details of the One-Time Adjustment calculation are included in the workpaper titled "WP Schedule 3 FERC Audit Refund AFUDC_F3R12 and F3R13". The One-Time Adjustment related to this finding totals negative $764,025.

Implementation of the two audit adjustments described above reduces the TO2022 Retail Base TRR by $1,430,645.

MATERIAL ACCOUNTING CHANGES WORKPAPERS

Material Accounting Changes Workpaper (TO2022)

Pursuant to protocol section 3(a)(10), SCE is required to include in the Draft Annual Update a description of any "Material Accounting Changes" included in the Draft Annual Update.

Material Accounting Changes are defined in the protocols as:

> "Material Accounting Changes" shall mean any material change that affects SCE's transmission rates as follows: (i) accounting policies and practices from those in effect for the Prior Year upon which the immediately preceding Annual Update was based, including those resulting from any new or revised accounting guidance from the Financial Accounting Standards Board; or (ii) internal corporate cost allocation policies or practices in effect for the Prior Year upon which the immediately preceding Annual Update was based; or (iii) income tax elections from those in effect for the Prior Year upon which the immediately preceding Annual Update was based; or (iv) cost allocation policies between EIX, SCE, and subsidiaries of either, from those in effect for the Prior Year upon which the immediately preceding Annual Update was based. Additionally, a Material Accounting Change shall also include any: (i) initial implementation of an accounting standard; or (ii) initial implementation of accounting practices for unusual or unconventional items where the Commission has not provided specific accounting direction.

SCE has identified 5 Material Accounting Changes implemented post calendar year 2019 that impact the recorded 2020 year and meet the above criteria:

On January 1, 2020, SCE adopted a FASB accounting standard to capitalize certain system implementation costs associated with cloud computing arrangements following the model used for internally developed software. For FERC accounting purposes these implementation costs will be accounted for as utility plant in FERC account 101 Electric Plant in Service and the depreciation will be recorded to FERC account 403 Depreciation Expense. The adoption of this guidance did not have a material impact on SCE's financial position or result of operations in 2020. The adoption of this guidance may have a material impact on SCE's financial position or result of operations in the future as a result of implementation compared to application of previous guidance.

On January 1, 2020, SCE adopted a FASB accounting standard that changes the method of measuring credit losses from an incurred loss basis to a current expected credit loss basis from financial instruments and other commitments. SCE adopted this guidance using the prospective adoption approach to available-for-sale debt securities and the modified

retrospective approach to all other financial assets, with no cumulative-effect adjustment to Retained Earnings FERC account 439 recorded. The adoption of this guidance did not have a material impact on SCE's financial position or result of operations. Expenses during 2020 increased as a result of assessment of future events on uncollectible accounts receivable. Had this accounting standard not been implemented, expense would have increased at a later point based on historical data.

On April 1, 2020, SCE adopted a FASB accounting standard prospectively that provides elective relief involving contracts, hedging relationships, and other transactions that reference LIBOR or another reference rate expected to be discontinued because of reference rate reform. SCE has not utilized any of the expedients therefore there is no impact on adoption of the guidance.

On July 30th, 2020, FERC approved SCE's request to use a special AFUDC rate for wildfire risk mitigation investments, which are not eligible to earn a return on equity and are intended to be financed entirely with debt under AB 1054, and exclude short-term debt specifically issued to finance CWIP related to wildfire risk mitigation investments from the calculation of the AFUDC rate for non-wildfire risk mitigation CWIP.

SCE has calculated the uncollectibles factor applicable to calendar year 2020 under Schedule 28 of the formula rate utilizing the total 2020 uncollectible amounts as reported in CPUC Advice Letter 4377-E-A, filed January 11, 2021, and approved by the CPUC on January 25, 2021. See also "WP Schedule 28 FFU". This change was necessary due to the dramatic increase in uncollectibles balances since early 2020 as a consequence of the Covid-19 pandemic and its economic impact on SCE customers, as well as CPUC and SCE efforts to limit disconnections for nonpayment during this period. This change affects retail transmission rates but has no effect on wholesale transmission rates.

SCHEDULE 1

COST ADJUSTMENT

WORKPAPERS

SOUTHERN CALIFORNIA EDISON COMPANY
Schedule 1 - Cost Adjustment

Cost Adjustment provision in the Formula Rate Protocols (Section 1, Introduction):

"Additionally, SCE shall include a Cost Adjustment in the Base TRR for the upcoming Rate Year in the event that a discrete cost of service item (e.g., individual O&M expense, tax expense, or revenue credit) incurred anytime between the beginning of the Prior Year and the September 30 immediately preceding the Annual Update filing (i.e., a 21 month window) is a one-time item that will not recur in such Rate Year. Individual items shall not be aggregated for purpose of determining a discrete cost of service item. The discrete cost of service item must amount to at least 3% of the Base TRR in such Annual Update filing in order for a Cost Adjustment to be included as a component of the Base TRR."

Note: Pursuant to parts a and b of Section 1, if the "discrete cost of service item" occurred in the Prior Year, the Cost Adjustment is "an amount with the same magnitude but of the opposite sign as the discrete cost of service item". If the item occurred between January 1 and September 30 of the year in which the Annual Update is made, then the Cost Adjustment is "an amount with the same magnitude and the same sign as the discrete cost of service item".

Description of the "discrete cost of service items" incurred in 2020 or 2021 and not expected to recur in the Rate Year:

1) In September of 2020 SCE reserved an additional reserve expense related to the "Thomas/Woolsey/Montecito" events of $1.297 billion.
2) In September of 2021 SCE reserved an additional reserve expense related to the "Thomas/Woolsey/Montecito" events of $1.265 billion.
3) On July 12, 2021 the Morongo Transmission LLC leased a portion of the West of Devers Line for a prepaid rent amount of $400 million.

Three percent threshold calculation (pursuant to the protocols, each discrete cost of service item must "amount to at least 3% of the Base TRR".)

Notes for Item #1:

1) The A&G expense impact on the Base TRR is the amount of the reserve times the Transmission Wages and Salaries Allocation Factor.
2) The Unfunded Reserve impact on the Base TRR is through its impact on total Rate Base. It is calculated as the product of the amount of the reserve times the T W&S Allocation Factor times the capital carrying charge.
3) The Cash Working Capital impact on the Base TRR is through its impact on total Rate Base. It is calculated as the product of the Capital Carrying Charge and the Impact on Cash Working Capital component of Rate Base
4) The Cost Adjustment is the negative of the cost impact on the Base TRR for expenses incurred in the Prior Year, since the discrete cost item occurred in the Prior Year (see Protocols).

1) The A&G expense impact on the Base TRR is the amount of the reserve times the Transmission Wages and Salaries Allocation Factor.
2) The Unfunded Reserve impact on the Base TRR is through its impact on total Rate Base. It is calculated as the product of the amount of the reserve times the T W&S Allocation Factor times the capital carrying charge.
3) The Cash Working Capital impact on the Base TRR is through its impact on total Rate Base. It is calculated as the product of the Capital Carrying Charge and the Impact on Cash Working Capital component of Rate Base
4) The Cost Adjustment is the same sign as the cost impact on the Base TRR for expenses incurred in the Prior Year, since the discrete cost item occurred in the first nine months of the filing year (see Protocols).
